

Maintenance Technician

Job Description:

Set up and run blown film extrusion machinery by performing the following duties.

- Perform breakdown repairs, installation, preventative maintenance, predictive maintenance, etc. on all production equipment, utilities, and building to maximize efficiency and reduce down time.
- Perform moderate to complex adjustments, maintenance and repairs to plant equipment such as slitters, extruders, flexographic presses, side-weld bag machines, and solventless laminators.
- Troubleshoot both electrical and mechanical problems with emphasis on electrical.
- Respond to immediate repair requests of electrical, production machinery and building equipment.
- Work from drawings, schematics, blueprints, job layouts and written or verbal instructions to perform assigned tasks.
- Perform routine preventive maintenance checks on all production equipment and machinery.
- Seek out ways to improve equipment performance and quality of product. Recommend changes related to equipment use to increase efficiency; keep the supervisor informed of problem areas.
- Use PLCs for routine troubleshooting.
- Uphold all OSHA regulations, GMPs, and food safety regulations.
- Meet plant objectives in safety, quality, cost and customer care.
- Maintain a positive work atmosphere by behaving and communicating in a manner so that you get along with clients, customers, vendors, co-workers and supervisors.
- Any and all other duties as assigned by the manager and/or designee.

Job Requirement:

EDUCATION and/or EXPERIENCE

Bachelor's degree (B. A.) from four-year college or university; or one to two years related experience and/or training; or equivalent combination of education and experience.

- Must have 3+ years experience in electrical and mechanical maintenance, repair, and installation in a manufacturing environment
- Strong ability in all areas of electrical maintenance, including 480v 3-phase motors, variable frequency drives, and controls is required
- Experience with mechanical, hydraulics, pneumatics, blue prints, motor drives, controls and PLC
- Strong mechanical and electrical troubleshooting skills; understand root cause, impact on production and prevent down time in the future
- Strong verbal and written English communication skills.

- A drive to succeed with a self-starter approach and a can-do attitude.
