

Product Inspector

Position Overview:

Key Operations support function that requires a combination of product inspection, computer data entry and material handling in meeting processing targets in our busy Product Returns division; May be cross trained to help in multiple functional areas as needed. Will support teammates by working in various areas to help achieve team goals.

Key Responsibilities:

- Physically inspect consumer products received from retail stores to determine if they meet manufacturer's standards to repair or remanufacture.
- Perform basic data entry steps to update manufacturers online inventory records for returned merchandise.
- Operate basic material handling equipment to move pallet loads, as needed.
- Lift, handle and relocate consumer products weighing up to 35 pounds.
- Follow safety guidelines while performing various duties to support team performance targets.

About the Company...

For over 25 years, CoreCentric has been shaping how remanufacturing, repair and recycling of electrical and mechanical parts gets done. Further, we have innovative solutions for blue chip consumer product manufacturers in handling their product returns – all in an effort to support a circular economy by extending the life of products and keeping them out of landfills. Because when things work better, we help our planet last longer.
