

JOB DESCRIPTION – SOLDERING TECHNICIAN I

Position Overview:

Apply hand soldering techniques to repair a variety of electronic controls utilized in household appliances. Manage a variety of daily assignments with an objective of meeting productivity goals to contribute to the team's overall success. Follow work instructions to perform repairs for various controls while maintaining company workmanship standards to achieve optimal quality results. Perform all work assignments in a safe and efficient manner.

Responsibilities:

- Perform basic hand soldering for basic to intermediate level of complexity thru-hole and surface mount components.
- Remove and replace components on a variety of control boards.
- Identify and correct electronic soldering defects.
- Utilize company-provided process control documents to successfully perform repairs.
- Maintain company workmanship standards to ensure optimal quality.
- Meet the departmental productivity goals on a daily and weekly basis.
- Utilize proper safety and ergonomics practices to include appropriate lifting techniques.

Requirements:

- A minimum of six months of hand soldering experience is strongly preferred.
- High school diploma or equivalent.
- Ability to read work instructions in the English language.
- Ability to lift up to 35 lbs.
